HONEYPRESS / GENERAL CARE OVERVIEW

A simple daily care routine.

Keep your coffee station ready for the next service. Follow the cleaning prompts and instructions for your specific HoneyPress model.

01

Follow the cleaning prompts

Complete the required rinse and cleaning programmes using the products specified for your machine.

02

Empty and refresh

Empty the grounds container and drip tray, and clean removable parts as directed in the model guide.

03

Care for the milk system

On milk-equipped models, complete the prescribed milk-system cleaning routine. Clean the steam wand according to your model instructions, where fitted.

04

Finish the station

Wipe exterior surfaces and check that cleaned parts are correctly refitted before the next service.

Use with your model guide. Your model's operating manual determines the cleaning products, amounts, frequency and detailed procedure. This page is a general care overview.
